

Blasting & Painting Services

Swire Energy Services offers a selection of blasting and painting services for a variety of equipment types. Our certified in-house coating experts can provide surface preparation and abrasive blast cleaning, as well as industrial-quality painting and coating via airless spray.

Key Features

- **Asset Inspection & Repair Recommendation**
Materials such as aluminium, carbon steel, galvanised steel, shop primed steel and stainless steel substances can be prepared by our sand, grit and wet blasting facility, to the highest standard for coating.
- **Surface Preparation**
Specialising in the application of anti-corrosive and high-performance coatings via airless spray.
- **High Performance Coating**
Our experienced team can provide helifuel system component repair and refurbishment.
- **Testing**
We have substantial experience in carrying out destructive testing to validate coating performance, and we can conduct these tests in-house and produce a test report.

Get in touch to find out how we can support your blasting and painting requirements in your region.
