

Cargo Baskets

Swire Energy Services support the world's largest fleet of DNV 2.7-1/EN 12079 cargo-carrying units for the offshore energy market.

An extensive range of sizes from 2m to 21m in length are available. Every unit has a full complement of load securing points and can be supplied with an optional net to eliminate the risk of the lifting set snagging on the cargo.

Custom-designed and manufactured cradles can be installed to enhance the security of high-value cargo. When compatible designs are used they can be safely and securely stacked to optimise space utilisation. Due to our fleet size, these baskets are generally available ex-stock and are provided on both short-term and long-term hire.

Key Features

- Range of sizes for all standard applications
- Ex-stock availability for urgent requirements
- Provided with internal swivelled tie-down points to ensure secure transportation of goods and cargo
- The units are stackable, reducing lay down area requirements
- Optional nets
- Optional custom cradles

All of our operational, support and design activity is built on ISO 9001:2008.

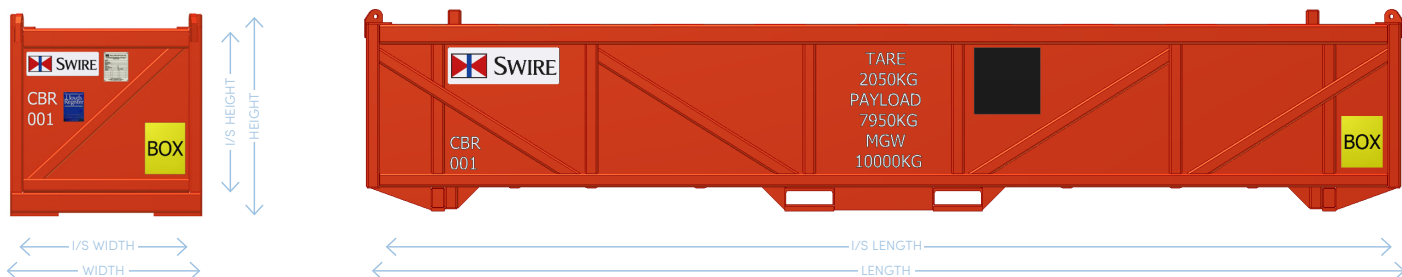

As you would expect, all of the appropriate units come complete with lifting sets, certified to meet DNV 2.7-1/EN 12079.

Swire Energy Services offer a full range of cargo-carrying units. Please see our contact details to obtain further information on containers, baskets, open-top containers, skips, chemical tanks, half heights and modular systems.

Contact the sales team for more information.

Short & Long Cargo Baskets
