

Fleet Management

Offshore cargo-carrying units are essential for transporting project critical equipment and materials offshore, but managing a fleet of containers and tanks can be costly and labour intensive. With an ever-increasing demand to enhance efficiencies whilst reducing costs, Swire Energy Services can provide the solution.

By leveraging over 37 years of experience, we offer a fleet management service to allow our customers to focus on their core business. Each solution is fully tailored with the aim of streamlining and simplifying processes to increase utilisation and drive considerable cost savings.

Key Features

Inventory Management

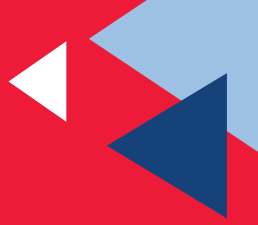

- Management of the day to day ordering, storage, tracking and use of the container and tank fleet and associated equipment

Fleet Management Coordinator

- A dedicated Fleet Management Coordinator can be based at our customers site who will oversee all fleet management activities

Inspection & Maintenance

- Management and facilitation of the necessary inspection and maintenance of cargo-carrying units, both on and offshore, so that our customers can be assured they are operating to maximum efficiency and are compliant with industry regulations

Key Features

Asset Tracking

- Swire Energy Services' asset tracking software, OverVu®, provides increased visibility and enables our customers to monitor the location and compliance status of their equipment and materials throughout the supply chain

Transportation Management

- Ensuring the efficient and cost-effective onshore transportation of cargo-carrying units to customer bases and quayside

Reporting

- Our customers can be safe in the knowledge of full transparency and will receive detailed reporting against set KPI's. Swire Energy Services will also use this data to make recommendations for continuous improvement, efficiency gains and cost savings
